

Lower Mays Solar Farm

Hello

We are writing about a new solar farm we are planning on land at Lower Mays Farm. The 5MW site would cover an area of approximately 24 acres, with the potential to supply power to the equivalent of 1,500 homes.

The project is in the early stages of development but we hope to submit a planning application for it in the New Year. Between now and then we will be sharing our plans with the local community and seeking feedback and views. This leaflet explains how you can find out more about Lower Mays solar farm and have your say if you would like to.

The map above shows the approximate location of the site. We hope to put solar panels in this field.

Access to the site would be from Langtye Lane, round to the A27 via Firle Road.

Our information hub - www.lowermayssolarfarm.com - has more detail about the site, the timeframe for the project, and why we've chosen this location. Our online exhibition will be hosted on this website too from 23rd November to 21st December this year. Visit the information hub then to read the information boards and see more details about our plans.

CONTACT US

Because of Covid-19 we can't meet face to face at the moment, but you can still contact us if you have any questions.

If you don't have internet access, please call us and we can share details with you by post.
