

Have your say on your future water supplies

With an increasing population and changing climate, we're looking at what needs to be done over the next 60 years to keep fresh, tap water flowing.

We want to hear your views on our plans which include:

- Building a second reservoir at Arlington
- A water reuse scheme along the River Ouse
- Further leak reduction and water efficiency measures

See the plans and speak to the team behind them on:

Monday 19 March between, 12:00 and 20:00 at Berwick Village Hall, Station Road, Polegate, BN26 6TD.

Our Customer Care Team will also be on hand to talk through the range of services we offer, from help for those with additional needs to assistance in paying your water bill.

Your comments really will help shape our final plans.
